Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Cossement (GB'321). The GB publication describes both optical isomers of ceterizine which are the last 2 species of claim 9 and sole species of claim 10. See p.9 and 10. Ceterizine is taught for a variety of allergic conditions including those pertaining to cutaneous disorders such as pruritus, urticaria as described on p.1. Currently, there is no purity limitation in the claims and thus applicants' claims cover the racemate as well as the individual isomers. However, even with a purity limitation, the narrow disclosure in Cossement (cetirizine and its two isomers) constitutes an adequate written description of instant isomers for aforementioned uses claimed herein. Note In re Schaumann 197 USPQ 5. One reading Cossement would include all forms of ceterizine as having the uses disclosed on p.1.

Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Gray (US'183). Gray applied as of its effective filing date of 9/24/92 discloses (+) cetirizine (dextro form) for uses claimed herein. See column 3 which lists various cutaneous conditions. **The claims are directed to treating certain forms of urticaria which result from allergies. Note MPEP 2306 and 2307.**

All references cited above have been previously provided in earlier related case, 10/162576, now abandoned.

Should applicants delete the subject matter rejected above from the claims, a complete response to this office action must include an election of a single species consistent with applicants' expected urging of patentability over the anticipatory art applied.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Emily Bernhardt whose telephone number is (571) 272-0664.

If attempts to reach the examiner by phone are unsuccessful, the supervisor for AU 1624, Dr. Mukund Shah, can be reached at (571)272-0674.
